Juan Camilo García

Full Stack Developer & Software Architect

Lebrija, Santander, Colombia • juancamilo.garcia.dev@gmail.com • linkedin.com/in/juan-camilo-garcia- • github.com/SnackMasterDev • portfolio-snackmaster.vercel.app

Software Developer and ADSO Technologist (SENA) with substantial track record across accelerated agile work simulations and high-impact engineering projects. Specialized in the **TypeScript, React, Node.js, and relational / time-series databases (PostgreSQL, TimescaleDB)** ecosystem. Proven experience taking on frontend technical leadership, system architecture, relational modeling, and authoring formal engineering specifications (SRS under IEEE 830, OpenAPI 3.0 contracts). Committed to Clean Architecture, SOLID, clean code, and measurable performance.

KEY ENGINEERING PROJECTS

Architecture · Code · Deployments

PriceScope — B2B Macroeconomic Monitor

In Production · 2026

Role: Frontend Tech Lead & System Designer | **Live Deployment:** pricescope-frontend.vercel.app

- **Engineering & Formal Specs:** Authored full Software Requirements Specification (SRS under IEEE 830) derived from business user stories and designed OpenAPI 3.0 contracts for ingestion microservices.
- **Relational Persistence & Live Dashboard:** Engineered relational database architecture in **PostgreSQL 16 + TimescaleDB** for retail inflation time-series, and delivered real-time analytics dashboard in React + TypeScript deployed on Vercel.

ServiceFlow — B2B Helpdesk & SLA Management

2026

Role: Frontend Developer & UI/UX Designer | **Demo:** service-flow-snack.vercel.app | **GitHub:** SnackMasterDev/service-flow

- **Ticketing Engine & SLA Timers:** Corporate helpdesk platform with reactive SLA countdown timers, visual status tracking, and multi-tier approval workflows.
- **Tech Stack:** Built with React 19, TypeScript, Tailwind CSS, shadcn/ui components, and clean decoupled services and custom hooks.

Mizu Ecosystem — SENA Capstone Project

In Development · 2026

Role: Lead Software Architect | **GitHub:** github.com/SnackMasterDev/mizu-ecosystem

- **Enterprise Architecture & C4 Model:** Multi-tiered architectural design for a 5-app restaurant and water management suite with Go/Node.js microservices, PostgreSQL/TimescaleDB, and telemetry.
- **Engineering Standards:** Complete IEEE 830 SRS specs, BDD acceptance criteria (Gherkin), UML class diagrams, and interface contracts systematically documented.

Sakura Interactive Canvas — 2D Graphics Engine & UI

2026

Web: portfolio-snackmaster.vercel.app | **GitHub:** github.com/SnackMasterDev/Portfolio

- Canvas 2D graphics engine decoupled from React running at stable 60/120 FPS with sword kinematics, anti-tunneling polygon collision detection, procedural Web Audio API zen sound, and bilingual architecture.

WORK EXPERIENCE & AGILE SIMULATIONS

Scrum Simulations & Production

Frontend Tech Lead & UX/UI Designer · No Country — Agile Simulation · PriceScope — 10/2026 — 11/2026

Agile Development Squad · Remote

- Technical interface architecture leadership with Next.js 16 (App Router), React 19, TypeScript, Tailwind CSS v4, Recharts, and Radix UI.
- Data environment and persistence configuration on PostgreSQL 16 + TimescaleDB using Docker Compose.
- Co-authored formal engineering documentation (SRS, OpenAPI 3.0, relational database schema, and risk matrix).

Frontend Developer · No Country — Agile Simulation · ServiceFlow — 10/2026

Agile Development Squad · Remote

- Collaborative development in agile Scrum squads with biweekly sprints, continuous integration, and peer pull request reviews.
- Modular UI construction with React, Vite, Tailwind CSS, and shadcn/ui components with strict TypeScript typing.
- Integration with REST API endpoints for real-time ticket state tracking and assignee accountability.

Full Stack Developer · No Country — Agile Simulation · ReservApp — 07/2024 — 08/2024

Agile Development Squad · Remote

- Built interactive React components for real-time restaurant table layout visualization and reservation management.
- Integrated backend services, coordinated with UX/UI designers, and successfully delivered sprint milestones under Scrum.

Customer Service & Technical Support Representative · Atento — 08/2022 — 02/2023

Telecommunications Sector

- Methodical troubleshooting and resolution of technical and billing incidents adhering to corporate SLA benchmarks and QA metrics.
- Documented escalation to specialized departments with assertive communication and strong problem-solving under pressure.

EDUCATION & TRAINING

Technologist in Software Analysis and Development (ADSO) · SENA — 2024 – 2026 (In Progress / Practical Stage)

Comprehensive education in Software Development Life Cycle (SDLC), software architecture, relational database modeling (PostgreSQL, SQL), Object-Oriented Programming (OOP), design patterns, automated testing, and agile methodologies (Scrum).

TECHNICAL SKILLS

Programming Languages:	TypeScript, JavaScript (ES6+), SQL, HTML5, CSS3, Python (Básico)
Frontend:	React 18/19, Next.js, Vite, Tailwind CSS v4, HTML5 Canvas API, Web Audio API, shadcn/ui, Radix UI
Backend & Persistencia:	Node.js, Express, REST APIs, PostgreSQL 16, TimescaleDB, OpenAPI 3.0 (Swagger), Docker Compose
Architecture & Methodologies:	Clean Architecture, SOLID, DDD, IEEE 830 SRS, Modelo C4, Scrum, Git / GitHub, Vercel
Languages:	Spanish (Native) · English (Technical / B1 - Fluent technical documentation reading & spec authoring)
